Rocket: Instructions

Cutting intended for grown-ups only.

Instructions

1. Print out pages on regular paper or cardstock and cut out all of the pieces. Don't cut along the dashed lines. This is where you will fold the paper.
2. Fold each dashed line in Rocket's body away from you. Glue the tabs to the inside to create Rocket's shape.
3. Fold Rocket's left and right engine pieces in half along the dashed line. Fold the tabs on the ends outward in opposite directions to create a base to attach the engines to Rocket. Make sure your pieces are lined up and glue the engine together where it is folded in half. Press until the glue dries. Repeat this step for the fins and antenna.
4. Attach the engines to the side of Rocket and then attach the fins to the top of the engines. Attach the antenna to the front of Rocket and you are finished!

Disney Family.com's printable crafts are specially designed with muted colors to not waste too much of your printer's color ink.
